Patient Trajectories in Biopsy Representation Space

CLAD Survival · C-index 0.595 · Background: model hazard score (red=high, blue=low)

Numbered visits in order · ○ first visit ★ last visit

True Positive
(Died early · HIGH risk)
LT227 · event 35d · 21 visits · risk=4.66

n=9 patients in quadrant

False Negative
(Died early · LOW risk)
LT115 · event 83d · 27 visits · risk=-6.74

n=1 patients in quadrant

True Negative
(Long survival · LOW risk)
LT054 · censored 1060d · 21 visits · risk=-8.30

n=17 patients in quadrant

False Positive
(Long survival · HIGH risk)
LT318 · censored 2504d · 10 visits · risk=2.46

n=31 patients in quadrant

Model hazard score

True Positive — (Died early · HIGH risk)
False Negative — (Died early · LOW risk)
True Negative — (Long survival · LOW risk)
False Positive — (Long survival · HIGH risk)
